

ENZYMATIC DEBRIDER

De-Slough[®]

POWERFUL AGENT AGAINST SLOUGH

Enzymatic Debridement

Papain works to liquefy and break down necrotic (dead) tissue and slough, creating a cleaner wound surface.

Moisturizing and Softening

Urea softens the outermost layer of the skin, which helps to loosen and facilitate the removal of dead tissue.

Indications

- Chronic non healing wounds
- Diabetic foot ulcers
- Venous ulcers
- Surgical wounds
- Pressure ulcers
